

DISTRICT COMMUNITY AND VOCATIONAL COMMITTEE.

CHAIRMAN - WALLY K. DALY.

MESSAGE IN A BOTTLE PROJECT.

The “Message in a Bottle” project for Community and Vocational club chairmen provides people – usually those who are elderly and live alone – with a contact information sheet in which the elderly person writes their emergency contact details. This form is then placed in a “bottle” – similar to a 35mm film container – and then left in the fridge. An accompanying small sticky label is placed in the individual’s window to inform any emergency service personnel that this information is available should it be needed.

The scheme is free with containers and forms being obtained from local Chemists or Doctors Surgeries. It may also be available from Neighbourhood Watch groups, Age Concern, Council Offices, Housing Associations and many other places including Police stations.
